Problem Statement:

I would pay money to be able to block all ads on any app or website.

Details:

Everyone experiences ads, whether it be on youtube, games, social media or even streaming services. Netflix is the latest streaming service to add ads to its basic plan. Tiktok was once a simple 15 sec dancing video app but has now been overrun by constant ads and tiktok shop promo videos. These constant ads have caused me to delete some of my favorite games and stop watching as many youtube videos. What used to be a peaceful listen to a podcast is now ruined by the random multiple ads played throughout it.
